SAP Business One on HANA Technology
The Framework Your Business Needs to Grow

Big Company Performance Built for Growing Businesses

SAP Business One with HANA is a complete business management solution that runs all of your key business processes powered by in-memory computing. Designed specifically for growing small to midsized businesses, SAP Business One with HANA integrates all core business functions across your entire company – from financials and accounting to inventory and customer relationship management – with real-time reporting and analytics.

By eliminating layers of complexities and unnecessary business costs found in legacy IT architecture, this single solution can help your business run faster, smarter, and more efficient. SAP Business One with HANA delivers value by helping to speed up your processing times so business transactions are available for analysis the second they complete.

With a streamlined IT landscape, here is what to expect with this solution:

In-memory computing provides for both the storage and processing of massive amounts of data in the main memory (RAM) of specially configured servers. This method also minimizes data movement and combined with SAP's approach to database organization with HANA, incredible performance gains are realized.
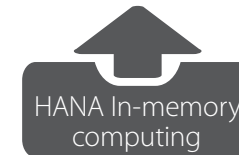

Fast processing speeds
Accelerated business processes and a more responsive user interface to instantly update gives you access to real-time analytics and accurate business information with no delays or wait time.

Smart decision-making
Transform your business data using a single system with embedded analytics to manage the most critical information across your operation and empower your employees with interactive analysis capabilities so they can make the right decisions when they need to.

Manageable growth
Developed for scalability, this affordable solution provides a foundation to analyze large quantities of data from virtually any source so you can instantly analyze growing volumes of data without complicating your IT landscape.

Solution Highlights:

✔ Single system for processing analytics and transactions

✔ Smarter business process handling

✔ Highly scalable

✔ Analytical content embedded in transaction screens

✔ Crystal Dashboards and Reports

✔ Enterprise search

✔ Dashboards and analysis

✔ Ad-hoc interactive reporting

ERP and Analytics Running Side by Side

Bringing together your transactional and analytical workloads into a single, real-time database transforms how you make your business decisions. Using this solution you can take advantage of the high speed analysis of all your business information to get the answers you need right away. Any small business can benefit, especially those that operate in industries that process large volumes of transactions or need insight into their companywide data instantly.

● Financials   ● CRM   ● Production
● Sales   ● Inventory   ● Purchasing

HANA In-memory computing

SAP Business One provides a foundation to analyze large quantities of data from virtually any source, in real-time. With HANA computing analytics, reports that used to take days or hours to run and compile now take only minutes, if not seconds. This innovation was previously only available to large enterprises but is now available to smaller businesses with a smaller budget. Here is what's included:

Pervasive Analytics
Embedded analytical content that reflects real-time transactional activity on a daily basis to help you better visualize you operations

Advanced Available to Promise (ATP)
Real-time inventory transparency and dynamic aggregation of inventory on-hand, promised and desired

Cash Flow Forecasting
Complete, accurate and timely picture of your cash flow to allow for better decision-making

Enterprise Search
Access all SAP Business One data with freestyle search for a seamless user experience
